I'm a Frontend Developer with a strong history in website management and development. Expert in all aspects of website creation, including design, plugins, SEO, optimization, and Website Hosting implementation.

## Projects

---

### JavaScript Project

#### Expense Tracker

The Expense Tracker that was built using HTML5, CSS3, JavaScript, and Bootstrap has a feature that shows the remaining balance, and it also allows you to record your transactions as either savings or expenses (use - before your expense amount).

### JavaScript Project

#### Rock Paper Scissor

HTML5, CSS3, and JS are used, and the design styles are Glassmorphism and Neumorphism. In addition, an awesome preloader has been implemented so that website loading is no more tedious

### JavaScript Project

#### Form Validation

HTML5, CSS3, and JavaScript were used to create this Form Validation. Tailwind CSS was utilized, along with Spline (A design tool for 3D web browser experiences ). Use a combination of capital, lowercase, special characters, and numeric characters in the Password field.

### JavaScript Project

#### Tic Tac Toe

The user interface (UI) of this Tic Tac Toe game is really simple, and it also includes an option to start a new game. This game was made using HTML5, CSS3, and JavaScript.

### Frontend Development

#### Simple Portfolio

This simple portfolio was built with REACT, HTML, CSS, and JavaScript, and it features an up-to-date user interface design, as well as a straightforward and understated look that is appropriate for usage by everyone.

### Personal Project

#### WappKit

Everything you see on the homepage and dashboard was made by myself using HTML, CSS, JavaScript, jQuery, Bootstrap, and the Lottie animation library. I've also created the PWA app for Wappkit, which is compatible with both iOS and Android, and published it on the Google Play Store.
